VitrrA

We progressively invest in essentially
human spaces - the bathrooms.

The complete bathroom

VitrA designs and produces complete bathrooms that satisfy both physical and emotional needs, with a coherent harmony between all the individual elements.

It's all about inspiration

Making change in the bathroom begins with understanding human needs and desires, inspiring consumers to make the best choices.

High powered perfection

Seven factories around the world produce sophisticated ceramics, furniture, faucets and tiles, upholding world-class standards and reducing environmental impact.

Collaboration with designers

VitrA collaborates with acclaimed designers internally and around the world, infusing products with creativity and originality.

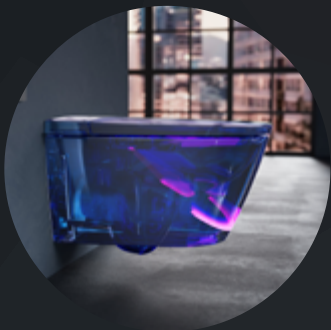

VitrA across the world

VitrA's bathroom designs are admired by customers around the world, through 2,000 sales points in over 75 countries, including 150 exclusive showrooms.

Technology lights up the future

VitrA Innovation Centre leads the bathroom industry with human-centric solutions and technology, powered by a strong engineering team.

Improved personal hygiene

VitrA's innovative hygiene technologies, informed by extensive research and knowledge, enhance human health and elevate the personal hygiene experience.

Bathrooms for our planet

VitrA is dedicated to fostering a sustainable future in all activities and preserving the delicate balance of the environment, resources, society and business.

The smart choice of toilet

Switching from cleaning with paper to water has a myriad of benefits; VitrA V-Care smart toilets let you rethink your approach to personal cleanliness.

A new level of hygiene and comfort

Using water-based cleaning is not only a lifestyle choice, it also offers a variety of advantages for older and less physically able people.

VitrA's smart toilets combine hygiene, well-being and design to create a new level of personal comfort in the bathroom. Water cleanses gently and effectively, the most sensitive parts of the body, offering a strong hygienic advantage over toilet paper. Water removes residue and bacteria in the most natural way. Unlike dry paper, water takes care of the skin in the gentlest and most soothing way.

The transition from a conventional toilet to a smart toilet may seem unusual for some people, which is completely understandable, but this change offers a significant opportunity for improved hygiene and additional comfort. Using the latest technology will turn your daily visits to the toilet into a moment of relaxation and the wide range of functions provides an extraordinary feeling of cleanliness.

Caring for the planet we share

The UK uses around 1.3 million tonnes of toilet paper a year, manufacturing a single roll of toilet paper uses a minimum of 54 litres of water and toilet paper alone is said to account for 15 percent of global deforestation. Using a smart toilet drastically reduces toilet paper usage, helping the environment while also being cost-effective.

Initially it seems obvious to use wet wipes as an alternative to traditional toilet paper. But the preservatives and perfumes they contain may cause skin irritations, and contact allergies. Water without soap, additives or perfumes is completely sufficient for a gentle cleanse. Additionally, wet wipes are a burden to water treatment plants and the environment. The antibacterial ingredients they contain inhibit the breakdown of the wipes. As a result, wet wipes may not fully decompose and clog the sewerage systems.

VitraA

V-Care advantages at a glance

A new level of hygiene

Engineered for effortless cleanliness, featuring advanced UV-C cleaning technology, easy-wipe surfaces, removable nozzle, and high-performance materials such as Duroplast, keeping your toilet fresher for longer.

Personalised comfort, every time

From gentle microbubble washing to adjustable seat warmth and soothing air-drying, V-Care tailors the experience to each individual's preferences.

Innovative technology, featuring an intuitive remote control and personalised app

Take full control of your comfort with the intuitive remote control and app, designed to let you tailor every detail of your experience.

Quiet performance for night-time peace

Silent Mode and whisper-quiet flushing ensure comfort without disturbance, day or night.

Family-friendly features that adapt to everyone

Child mode and smart user profiles make the toilet intuitive, safe and easy for every member of the household.

Designed with efficiency in mind

Power-saving functions and optimised water usage help reduce energy consumption and environmental impact without compromising performance.

Use less toilet paper, live more sustainably

Thoughtfully designed washing and drying functions minimise the need for toilet paper, supporting both comfort and sustainability.

Designed for inclusive accessibility

From hands-free operation to intuitive controls and customisable settings, V-Care ensures effortless usability for people with diverse needs.

Introducing V-Care 3

The smart toilet where intelligent hygiene meets effortless comfort

Imagine starting each day with the perfect balance of hygiene, calm and control.

The new V-Care 3 Smart Toilet range transforms the bathroom into a place of wellbeing, where advanced toilet hygiene meets exceptional user experience and effortless comfort.

Designed by Noa Design Studio each of the V-Care 3 models has been thoughtfully created, combining intelligent technology with beautifully understated design and a seamless user experience that feels as natural as it is luxurious.

From the moment you sit, the V-Care 3's smart technology goes to work, adjusting to your unique preferences for wash temperature, water pressure and air-dry settings. A soft-close durable Duroplast seat crafted for hygiene and comfort is accompanied by whisper-quiet operation and optional ambient lighting, creating a calm and restorative atmosphere.

Each element of the new V-Care 3 range has been thoughtfully designed and backed by extensive research – the range is designed around real people and real lives.

The new V-Care 3 range

V-Care 3 Base, V-Care 3 Core and V-Care 3 Prime each offers a distinct level of comfort and control.

Wall hung and back to wall models are available across the entire range, to suit all bathroom layouts and user requirements

V-Care 3 Base

Smart basics for everyday living

V-Care 3 Base offers essential smart toilet features in a sleek, minimal design. Enjoy personalised washing options with adjustable water temperature and pressure, intuitive remote control, and mobile app connectivity. With a durable Duroplast seat and efficient Vortex flushing, hygiene meets simplicity.

V-Care

V-Care 3 Core

Hygiene and comfort at the core

Designed for an elevated experience, V-Care 3 Core combines intuitive side-panel controls with fully customisable washing options via the mobile app. A soft inner bowl light enhances nighttime convenience, while Vortex flushing and a durable Duroplast seat ensure superior hygiene and comfort.

3

V-Care 3 Prime

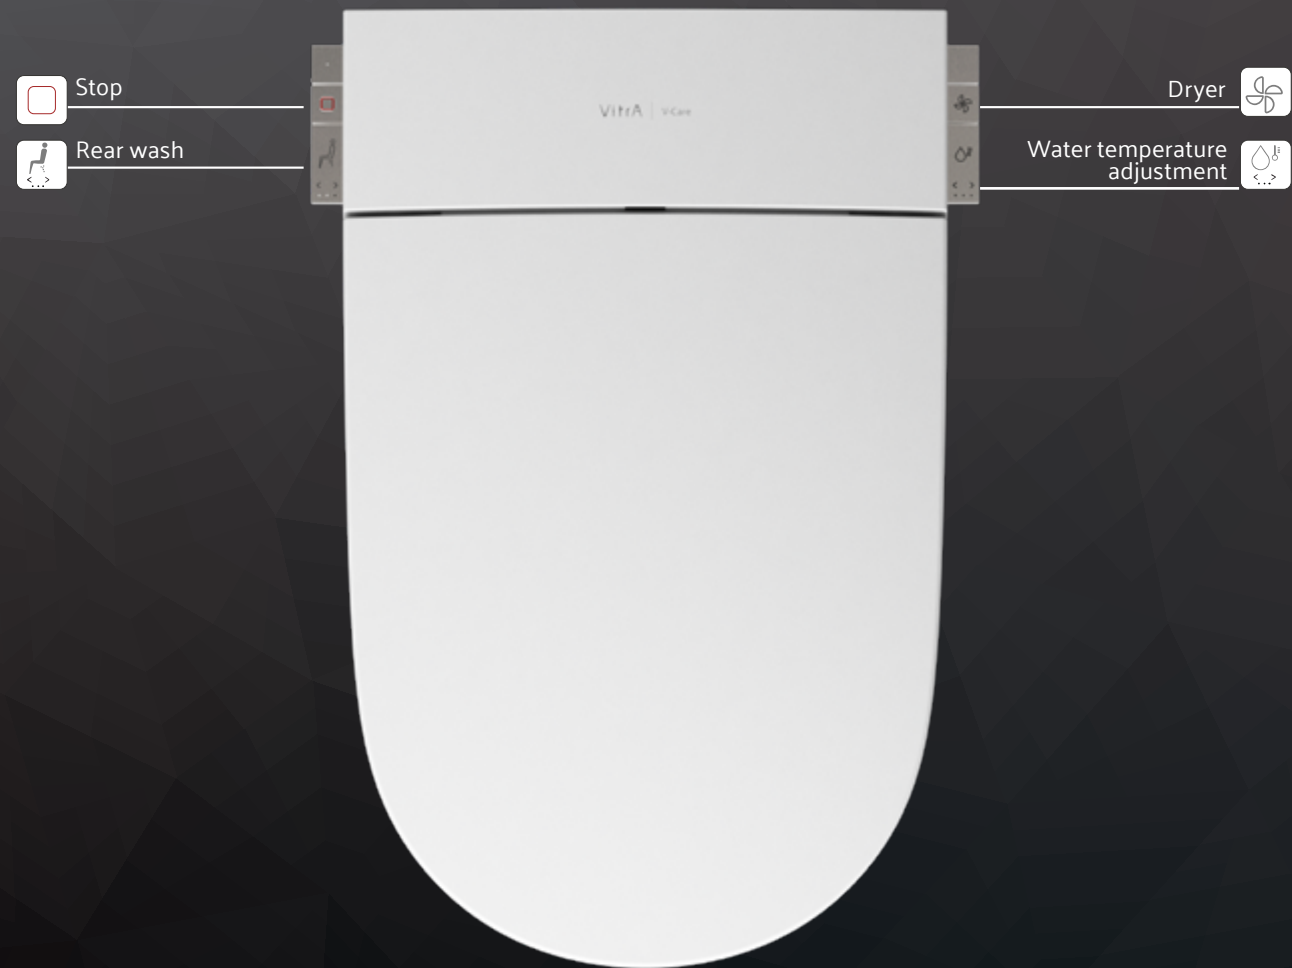

The prime choice for an ultimate experience

V-Care 3 Prime sets the standard for luxury and innovation. With ambient and inner bowl lighting, intuitive side-panel controls, and advanced customisation through the mobile app, every detail is designed for comfort. UV-C cleaning technology, Vortex flushing, and a durable Duroplast seat provide maximum hygiene for a truly premium experience.

Control at your fingertips

Side panel

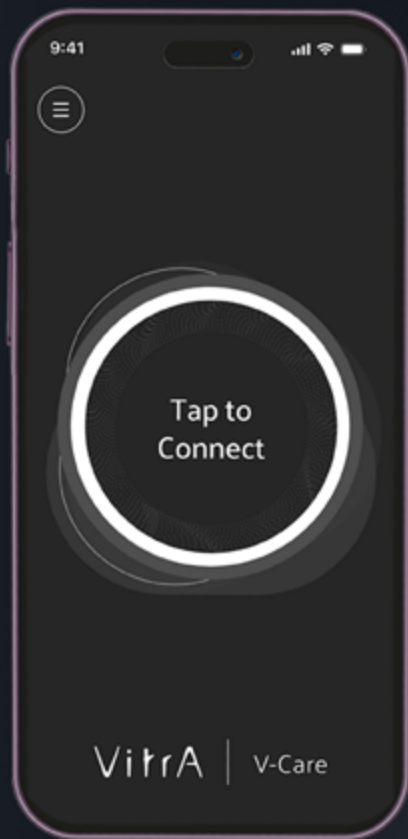

V-Care 3 Core and V-Care 3 Prime feature sleek side panels, seamlessly blending style and functionality. Easily access all functions with intuitive controls, all while enjoying a modern, sophisticated design.

Mobile app

The ultimate user experience & convenience via the mobile app

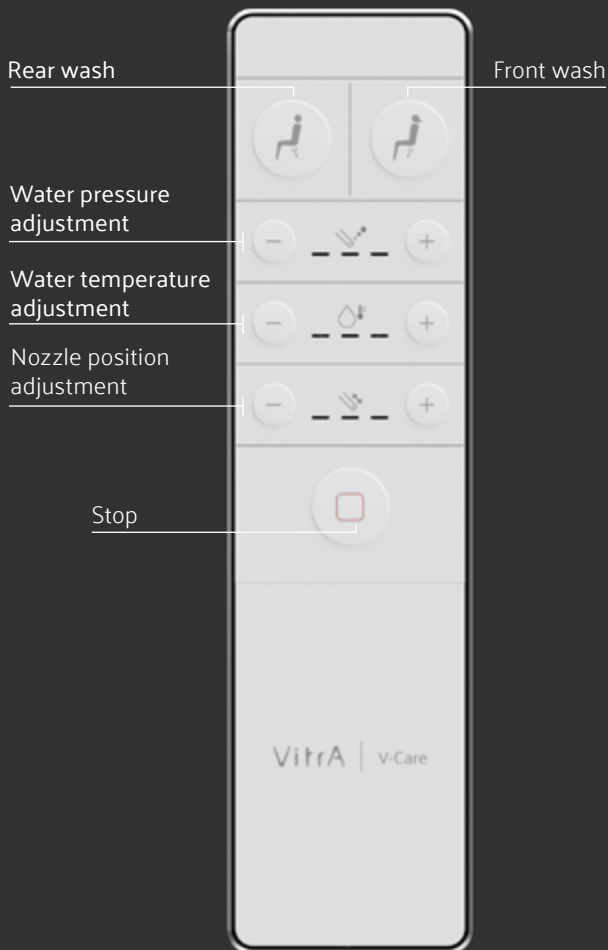

The V-Care 3 mobile app offers an unmatched level of smart functionality, far beyond standard controls. Users can create multiple customised scenarios tailored to their individual needs, adjusting settings such as water temperature, pressure, spray duration, and even the sequence of features. These personalised programmes can be saved and activated instantly with a single tap or voice command, making every use effortless. Intuitive and highly advanced, the app transforms hygiene into a fully tailored experience.

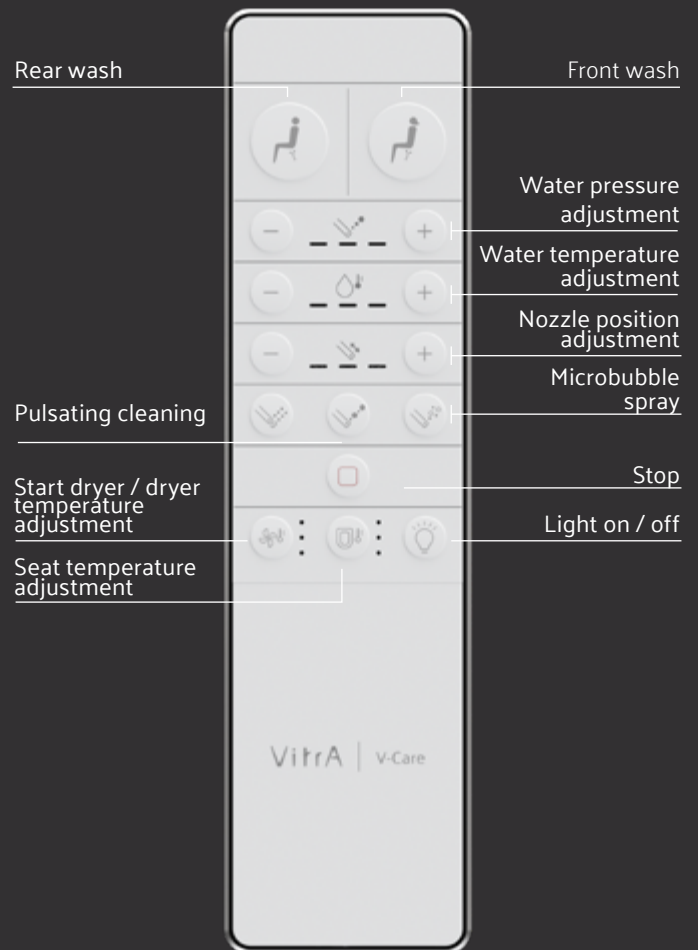

Remote control features

A simplified, tactile remote control provides ergonomic control at your fingertips.

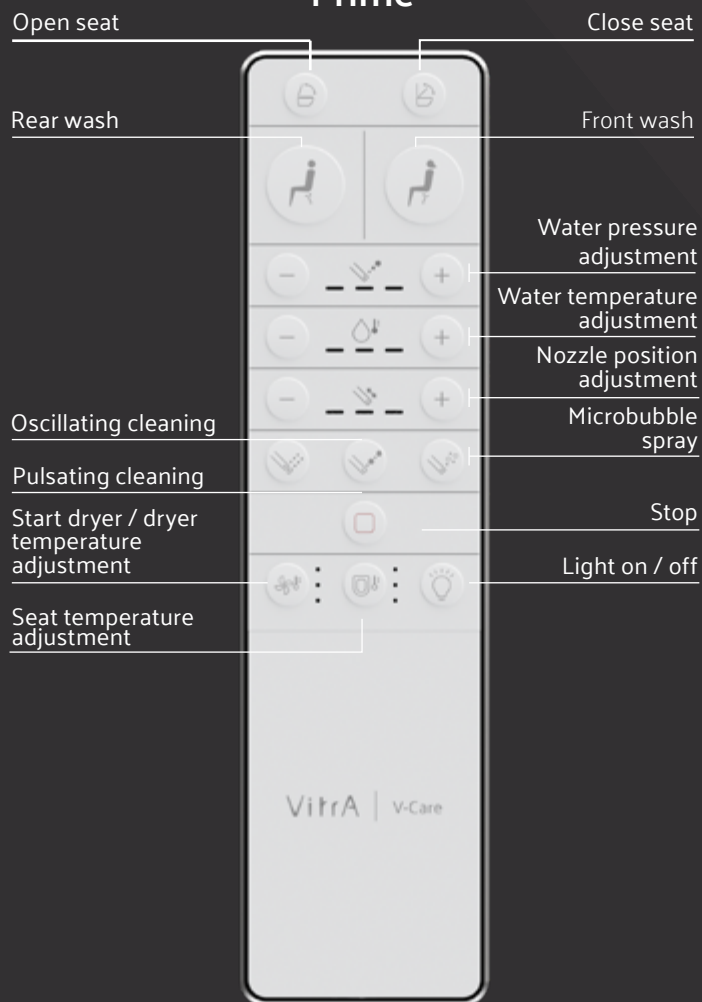

V-Care 3 Base

V-Care 3 Core

V-Care 3 Prime

Designed for superior hygiene and durability

V-Care 3 Smart Toilets go beyond conventional design with innovative features that enhance both hygiene and longevity. The powerful Vortex flush ensures an efficient, splash-free clean, while the durable Duroplast seat offers lasting comfort and enhanced sanitation. Together, these advanced technologies set a new standard for smart toilets, delivering a cleaner and more durable bathroom experience.

Vortex flush

Powerful flush, superior hygiene
Vortex flush technology provides a deep and efficient clean with every flush. By creating a strong, circular flow, it ensures effective waste removal and enhanced hygiene – making everyday bathroom routines cleaner and more effortless.

Duroplast seat

Durability means hygiene

The V-Care 3 seat is made from high-quality Duroplast, smooth, durable, and easy to clean. Its long-lasting surface helps maintain hygiene and comfort, day after day. Designed for both practicality and peace of mind.

V-Care 3 Prime features

Every detail is designed for your personal hygiene and comfort.

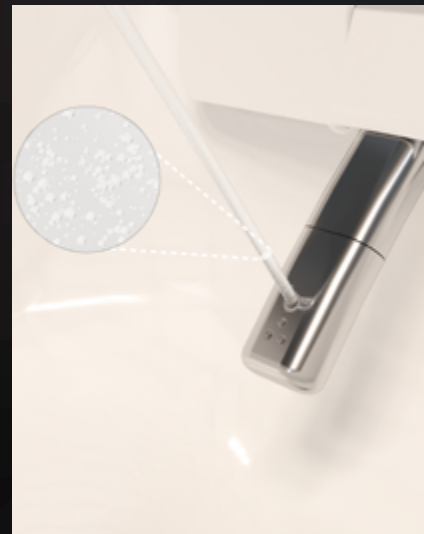

Front and rear wash

The nozzle produces a rear wash suitable for all, as well as a gentler front wash for women.

Adjustable water pressure

Three different levels of water pressure offer a thorough and pampering wash.

Microbubble

Infused with millions of microscopic air bubbles, the water wraps the skin in a soft, soothing touch, providing a deep yet delicate cleanse and a naturally refreshing sensation.

Adjustable nozzle position

Perfect cleansing by adjusting the nozzle back and forth.

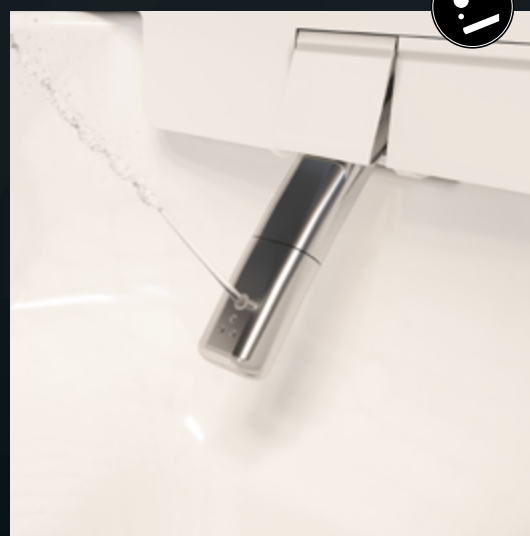

Adjustable water temperature

Three different water temperature settings offer a more comfortable cleansing ritual.

Oscillating wash

The bidet nozzle moves back and forth for a thorough clean over a larger area.

Pulsating wash

The water pressure alternates between gentle and firm for a massaging wash.

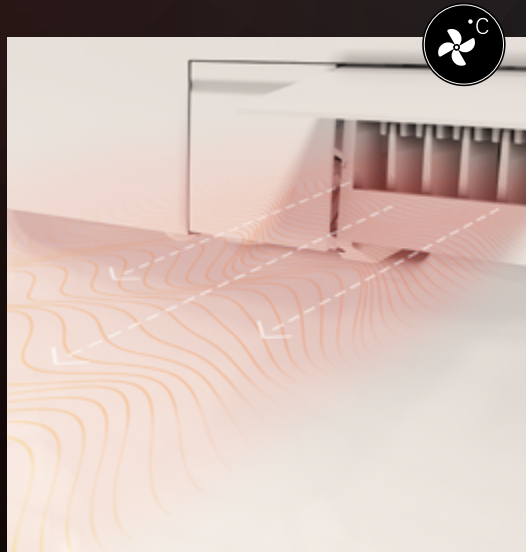

V-Care 3 Prime features

Every detail is designed for your personal hygiene and comfort.

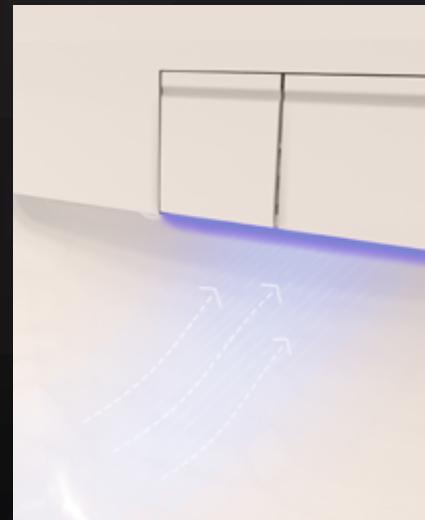

Adjustable seat temperature

The seat has a choice of three temperature settings for your comfort.

Dryer and adjustable air temperature

After washing, the warm air dryer provides fast and gentle drying. Also, free yourself from toilet roll. Three different levels of air temperature settings offer more comfortable drying.

Air purification

Thanks to powerful filters, the air is freshened around the toilet.

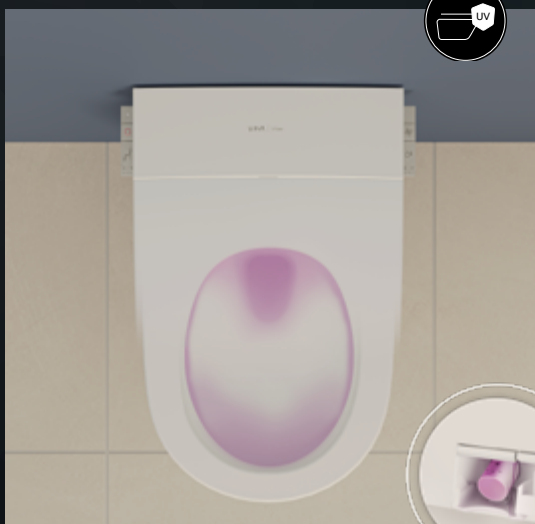

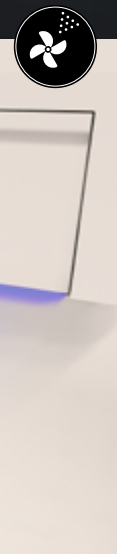

Auto open / close lid

The motion sensor automatically raises the lid on detecting your approach, eliminating the need to touch it. The lid and seat can also be opened and closed via remote control or mobile app for added convenience.

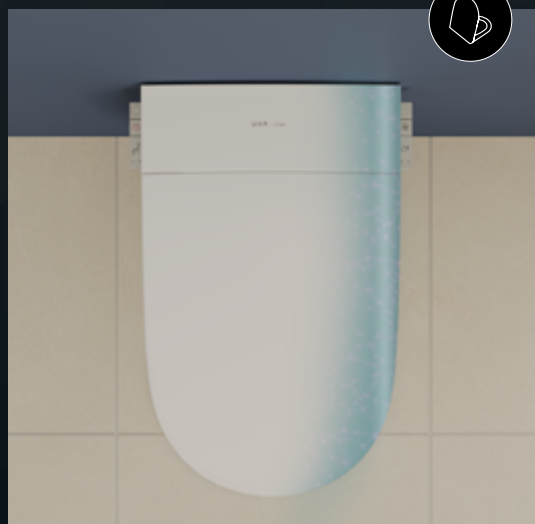

Ambiance light

The LED night light is automatically activated when light levels fall. Both inner and outer lighting can be adjusted to three brightness levels and switched on or off via the mobile app.

UV-C cleaning

V-Care 3 takes hygiene a step further with UV-C light technology that helps clean both the ceramic surface of the bowl and the bidet nozzle. The cleaning cycle is activated while the lid is closed and pauses automatically if the lid is opened, resuming once it is closed again. It is an effortless layer of protection, built right into your daily routine.

Duroplast seat

Durable and long-lasting: Crafted from high-quality Duroplast, the seat is resistant to scratches, stains, and everyday wear, ensuring it stays looking new over time. Its smooth, non-porous surface also supports better hygiene with minimal effort.

The original V-Care range

Perfect blend of comfort, functionality and design

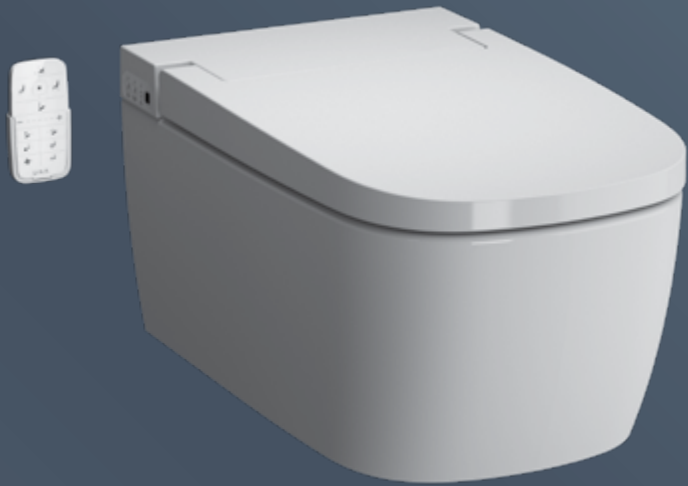

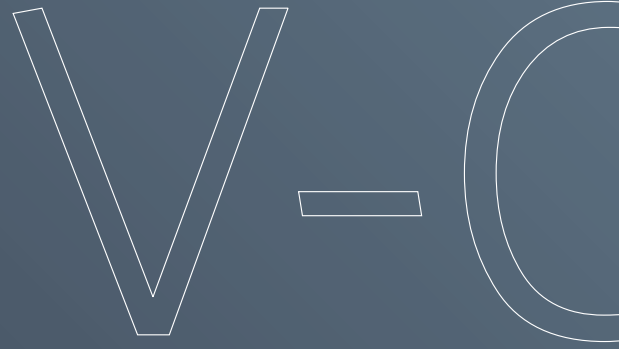

Vitra

The original V-Care range

V-Care Comfort and V-Care Prime each offers a distinct level of comfort and control.

V-Care Comfort

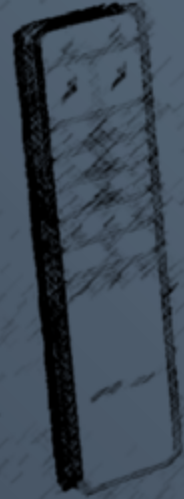

With the female and male wash function, this model is perfect for families. Alongside water-based cleaning, the adjustable seat temperatures and integrated air extraction are not the only features that ensure moments of relaxation. The integrated dryer completes the cleaning experience.

V-Care

V-Care Prime

Its individual setting options allow you to adjust each setting to suit your personal needs - from the nozzle function, water pressure setting, seat and dryer temperature control. The automatic air extraction, an integrated nightlight and contactless handling via remote control, makes the V-Care Prime a premium smart toilet.

Smart panels that complement the smartest toilet

V-Care smart toilets seamlessly pair with our smart control panels to deliver a fully touch-free, intuitive bathroom experience.

Controlled by voice commands or mobile app, our smart panels give you the freedom to flush remotely or automatically after use. The smart panel also allows you to save water by cleverly controlling the amount of water used in each flush all from the comfort of your phone.

For optimal performance, the integrated sensors are designed to work within defined detection zones that depend on installation height and surrounding surfaces. Highly reflective shiny walls, doors, floors, or nearby accessories may influence sensor behaviour and should be considered during design and installation.

When correctly planned, the system delivers reliable, hygienic operation across a wide range of bathroom configurations.

How to look after your V-Care smart toilet

Detailed instructions and further information are available on our website.

Scan to view

Remember to descale

VitrA Durgol descaler solution is available to purchase from VitrA.

V-Care smart toilets are equipped with a descaling system to periodically remove unwanted calcium build-up.

This should be carried out every two-three months, the frequency will differ according to the lime content of the water in your area.

Be careful not to use more than 60ml of descaling fluid solution.

Remember to clean the funnel with water before descaling to prevent dust and dirt.

If there is a power failure while descaling is in progress, simply repeat without adding descaling solution when the power is restored.

Clean with care

Avoid spraying water or liquid detergent directly onto any non-ceramic areas of the toilet.

Select a low or zero bleach content cleaner for cleaning non-ceramic areas of the toilet, this will avoid discolouration.

Do not apply excessive force on the toilet seat cover. It can damage the seat cover causing injury.

Useful to know

The remote control will start to blink when the battery is low, to let you know they need to be replaced.

If there is a period of prolonged non-use, it is advised to turn off the on/off valve at the water inlet, drain the water from the product using the water drain, and cut off the power. Before reuse, make sure to run the water for 30 seconds to ensure any remaining water is removed.

As this is an electrical product, care should be taken to not install it in a place that is prone to high humidity and is easily splashed by water.

Warranty information

10 year warranty for the ceramic sanitaryware

2 year warranty for the toilet seat
